BOARD COMMITTEES

All Board committees should conduct their activities so as to respect the regularly constituted administrative channels or lines of authority. Committees should refrain from becoming involved in administrative functions of the schools. However, committees may observe and review administrative functions to the extent necessary to verify that policies are being adhered to or to frame recommendations to the Board in areas of concern. It is a primary function of a committee to recommend policies and plans to the Board. It should also review implementing rules and regulations that are most appropriately developed by Administration.
