Personnel

Website Use

Adrian Public Schools maintains a District Website that serves as a communications tool for those wanting to know more about our school. It also is a way for currently enrolled students and their families to interact with teachers outside of the classroom. School and classroom websites are intended to:

- Provide information
- Inform parents and the community about curriculum
- Announce classroom, building and district events
- Showcase classroom or student projects

These pages are viewed by the public and are representative of your classroom, school and district. These pages should reflect the character and mission of Adrian Public Schools.
