Instruction

Pilot Programs

Adrian Public Schools supports innovation and improvements in instructional programs, offerings, equipment, and experiences for students through the use of pilot programs. Pilot programs allow the district the ability to plan, launch, and evaluate the effectiveness of programs, offerings, equipment, and experiences before fully adopting a program. Proposals for pilot programs will be facilitated in cooperation with the Superintendent and should include:

- a statement of project goals,
- anticipated expenses,
- equipment or materials, training,
- staffing positions,
- a synopsis of implementation strategies,
- contractual or policy implications,
- timeline, and
- plans for evaluation of the project.

Proposals should be submitted to the Superintendent for administrative review. Proposals recommended by the Superintendent shall be submitted to the Board of Education for approval prior to implementation. The Superintendent shall, at least annually, submit periodic reports to the Board on all ongoing pilot projects and evaluations. The Superintendent, after evaluation and consultation with pilot project developer(s), may recommend the adoption or termination of a pilot program prior to the anticipated timeline.
