Instruction

Video Programming Policy

The purpose of the Adrian Public Schools video programming policy is to set guidelines for programs which will enhance recognized instructional goals of the Adrian Public Schools. Those programs which conflict with these goals will not be acceptable. The final decision for program acceptance will be made by the building principal. Specific reasons for rejection are as follows:

1. Poor technical quality.
2. Obscenity, indecency, or pornography.
3. Libel or slander towards individuals, groups, or institutions.
4. Material deemed unsuitable to the purposes and character of the Adrian Public Schools.
5. Material of a political/partisan nature unless for an educational purpose.
6. Programming from organizations outside the Adrian Public Schools unless there is an educational connection with the school program.
7. Any material not in keeping with the standards of the Federal Communications Commission regulations.
8. Material not in keeping with the course content objectives.
9. It may be possible that, at some date, programming would be termed educationally enriching for a particular class or grade level but not suitable for a full audience viewing of all ages. In such event, the program may be used within the selected school setting but not deemed proper programming for the total student body.
10. All programs which are prohibited by copyright regulations.

The Board of Education adheres to all copyright regulations.

Adopted: May 20, 1975
Revised: February 11, 1985 (To Be Effective July 1, 1985)
June 3, 1987 (Effective June 15, 1987)
November 2, 2009
