School-Community Relations

**Lending of District-Owned Equipment**

The Board of Education believes that district-owned equipment is a valuable resource that may be loaned for community use under certain limited conditions, as long as such use does not infringe on the original and intended purpose of the equipment.

Equipment may be loaned to responsible community groups for a worthwhile educational, civic or charitable purpose. Equipment will not be loaned to groups for use in making a profit or for financial gain.

The group borrowing the equipment shall agree to accept responsibility for repairing or replacing equipment damaged while in its possession.

The equipment to be loaned shall not be unusually expensive or easily damaged. The equipment must be in good condition.

A written application must be completed by the individual requesting the loan of district equipment and approved by the building administrator prior to the release of the equipment.
