

Dear APS Head Start Families,

This morning, we received notification that one of our APS Head Start staff members tested positive for COVID-19. Those individuals within 6ft of the individual for more than 15 minutes or in the same classroom for more than 2 hours are considered close contacts. We generally share this communication after the Lenawee County Health Department confirms the case and confirms the close contact list aligns with their expectations. Because of the Lenawee County Health Department closure this week and the heavy demands on them right now their review may be slightly delayed so we are sharing this communication today. All close contacts were notified last night.

At this time, no staff or students have been identified as close contacts of the positive COVID-19 individual, who has not been on site at a Head Start location since December 1st, 2020..

We will continue to provide instruction to our students in accordance with our approved COVID-19 Response/Re-Opening Plan.

Questions can be directed to the Health Department at: 517-264-5226 Option 5.

Be safe and Go Maples!

David Bull

APS Head Start Director
